Jeff Noble provided for the purposes of creating a lasting video memory of our parents' 60th wedding anniversary held in November. As professionals involved in design, ads, photography, and video productions we possess the experience to evaluate the ability, quality, professionalism, and character of numerous audio video companies and their personnel nationwide. In working with Jeff Noble, we found him to set high standards for the execution and production of our project and performed well in excellence as well as business standards. His pricing was in the competitive range especially for the high quality of his product.

As experienced professionals in Corporate Communications for a nationwide Broker Dealer, we know the importance of eye catching design pieces, and more importantly the people and companies behind them. Jeff Noble provided high-quality professional services for a milestone event in our family and we are quite pleased with not only his skill and talent but also his forthright, honest, conscientious manner of conducting business. We would highly recommend Mr. Noble and we personally hope to contract his services in the future.

Meeting Expectations

We would also like to add that Jeff worked diligently to meet, change, and/or upgrade any and all aspects of the product in order to satisfy our personal preferences, while at the same time not sacrificing quality, design, or product value.
